Silk Charge&Go IX

# Discreet & ready to wear without the wait

Almost invisible in the ear, Silk Charge&Go IX is ready to wear on the spot without any fuss or waiting times thanks to its soft-silicone sleeves that simply click onto the hearing aids and allow them to hide securely and comfortably in your ear.

## Sleeves

The sleeves come in four different sizes and a closed and open build version suitable for most ear anatomies and hearing needs.

# All you hear, crystal clear

Whether you're in a crowded street, working in an open-plan office, or dining in a busy restaurant, wherever there's a high level of ambient noise, holding a conversation requires concentration and effort.

Thanks to its Signia Integrated Xperience technology, Silk Charge&Go IX delivers true-to-life sound and speech comprehension to meet your hearing needs, even in noisy environments. You hear what matters to you – all day long, in every situation.

## **Tinnitus options**

If you suffer from tinnitus, Silk Charge&Go IX features a range of therapy options to make your life more comfortable.

## **CROS Silk Charge&Go IX**

Untreatable hearing loss in one ear shouldn't stop you hearing what matters to you. CROS Silk Charge&Go IX ensures brilliant sound so you can hear conversations and sounds coming from both sides.

## Power to hear all day

Silk Charge&Go IX comes with the added convenience of on-the-go rechargeability for all-day listening. Plus, the accompanying case charges wirelessly, adding an extra level of hassle-free convenience.

## Perfectly positioned for phone calls

Unlike hearing aids that sit behind the ear, Silk Charge&Go IX's microphones pick up sound inside the ear canal. This enables you to make phone calls and listen to music in the way you're used to, including with over-ear headphones.

# Join the conversation

## **Silk Charge&Go IX**

So small that it's almost invisible in the ear, Signia's Silk™ Charge&Go IX delivers an exceptional hearing experience. One of the world's smallest hearing aids, you can wear it with confidence, safe in the knowledge that no one will even notice you're wearing it.

Comfortable and discreet, this tiny hearing aid provides the convenience of on-the-go rechargeability. It is packed with advanced sound features to support you in any environment including its unique Binaural OneMic Directionality, which offers unmatched conversation support in noisy environments for a hearing aid of its size.

Discover the perfect blend of comfort, stylish design, and innovative technology with Signia.

## About Signia

Signia is one of the leading hearing aid brands in the world. Our goal is to enhance human performance through iconic innovations that shape the prescription audio category. We refuse to accept hearing loss as a limitation. It's not about correcting a loss, it's about gaining an edge. Not just performing, performing brilliantly. Not just hearing again, but hearing better than ever. Hearing every word, beat, and breath. With Signia, you can Be Brilliant.

The information in this document contains general descriptions of the technical options available, which do not always have to be present in individual cases and are subject to change without prior notice.
